**AxleTech's New Web Site —
Everything Customers Need a Click or Two Away**

— Manufacturing Company Re-Engineers the Way Customers Access Information —

Troy, Mich., (June 29, 2006) — AxleTech International, one of the world's leading suppliers of specialty vehicle drivetrain systems, launched today a totally redesigned Web site that places a wealth of information and services literally a click or two away from its global customers.

“We engineer some of the most advanced off-highway and specialty drivetrain systems in the world, so we want our Web site to reflect the same attention to process that we have with our products,” said Mary Petrovich, Chief Executive Officer. “The new site is significantly improved and process optimized – looking at all ways a customer would like to access information and creating a flow that brings them to what they want cleanly and quickly. A lot of work went into taking a complex topic and making it simple.”

Customers can locate products by industry — agriculture, construction, forestry, aircraft ground support, materials handling, military, mining or specialty vehicle. They can also find a product by family — axles, independent suspension axle systems, transfer cases, brakes or axle options. Individual sections of the Web site containing product guides, application sheets, service manuals and warranty information are one click away from the home page.

Entry to the Aftermarket section, which features genuine AxleTech, Rockwell, and Off-Highway Meritor Parts, is also one click away from the home page. “Customers will find information on products, service manuals, key contacts and a link to www.offhighwayplus.com, AxleTech's Web site for placing orders on-line 24/7. On that site, only two clicks away from the home page, customers can also access information on parts availability, pricing and more,” said Bill Gryzenia, Vice President Aftermarket Business Development.

Please visit www.axletech.com and see how the new site can help customers learn more about a specialty driveline product or order an aftermarket part.

AxleTech[™] International

About AxleTech International

AxleTech International is one of the worlds leading designers and manufacturers of drivetrain components, systems, and aftermarket parts serving the commercial, industrial, construction, agricultural, mining, forestry and military vehicle markets. We are a leading supplier of heavy-duty off-road planetary axles, high-mobility vehicle hub reduction axles, independent suspensions, transfer cases and brakes to OEMs on every continent. AxleTech is a privately owned company with origins as the North American off-highway and European specialty division of Rockwell International. AxleTech is headquartered in Troy, Michigan, U.S.A.
