

OVERVIEW

AxleTech's 120 Series Carriers are specifically designed to meet the rugged demands of off-highway and on-highway applications including mobile cranes, fertilizer spreaders, harvesters, lift trucks, and more. The 120 Series Carriers are an aftermarket product offering from our line of heavy-duty rear carriers which are available in a wide range of ratios and manufactured with all new carrier shells and gearing.

FEATURES AND BENEFITS

High-capacity hypoid gearing

Increases strength and torque capability when compared to spiral bevel gearing

Thrust screw in carrier

Provides ring gear support under high torque conditions

Wide axle ratio range

Matches customer vocational requirements

Unitized input pinion seal

Extends carrier life by eliminating leak paths and reducing contamination levels

Optional limited slip differential

Improves traction and mobility in severe vocations without the need of driver input
